## DETAILED ACTION

### *Response to Amendment*

Applicant's arguments with respect to claims 1-8 based on the Response filed on 03/30/2005 have been considered but are moot in old ground(s) of rejection. Therefore, this is Final action.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Takizawa et al. (US6573964B1).

In regard to claims 1 and 7, Takizawa et al. teach (Figs. 1, 3 and 6) a pixel structure for a liquid crystal display comprising

- a first substrate (upper substrate), with respect to a pixel, having a W-like extruding structure 11 composed of two V-like structures formed on a surface of the first substrate; which is respect to a top view of the first substrate;
- a second substrate (lower substrate), parallel to the first substrate, having a plurality of openings (split 20 formed on pixel electrode 1), wherein the openings

Art Unit: 2871

are aligned along a direction from a tip of the V-like structures to an edge of the pixel structure and vertical to a long edge of the baguette pixel structure as shown in Fig. 6;

- a liquid crystal layer 22 located between the first substrate and the second substrate,

wherein

- the first substrate and the second substrate produce a multi-domain vertical alignment structure in the liquid crystal layer (col. 1 lines 11-16);
- the W-like extruding structure abuts (touches) the liquid crystal layer as Fig. 3 shown.

Claims 2 and 8:

- a shape of the openings comprises an isosceles triangle, and sides of the isosceles triangle are parallel to sides of the V-like structure as Fig. 6 shown.

Claim 3:

- the aligned direction of the openings is parallel to the central line of the V-like structure as Fig. 6 shown.

Claim 4-5:

- The shape of pixel structure is baguette (quadrate).

Claim 6:

- the V-like structure has a tip angle of 90 degrees as Fig 6 shown.

***Response to Arguments***

Applicant's arguments filed on 03/30/2005 have been fully considered but they are not persuasive.

Applicant's ONLY arguments are follows:

Takizawa fails to disclose (a) the protrusion 10 forming the W-like structure in one pixel, where one TFT 4 controls one pixel structure; (b) the slits 20 arranged to be aligned along a direction from the tip of the V-like structure.

Examiner's responses to Applicants' ONLY arguments are follows:

Takizawa fails to disclose (a) the protrusion 10 forming the W-like structure in one pixel where pixel is area comprising two or more pixel electrodes (attachment I); (b) the slits 20 arranged to be aligned along a direction from the tip of the V-like structure (see attachment II), but the slits 20 are not right below the tip and dividing the V-like structure into two portions or not the slits are not overlapped the tips of the W-like structure as Fig. 2 in the instant application.

Furthermore, feature "one TFT controls one pixel structure" is not stated in the claims 1 or claim 7, therefore, this argument is irrelevant.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2871

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
